Saul Hernandez

Full Stack Developer

San Salvador, El Salvador • +503 6680 6151 • sahc1987@gmail.com • linkedin.com/in/saul-hernandez-dev • github.com/sahc1987

PROFESSIONAL SUMMARY

Full Stack Developer with 7+ years of experience building and scaling web applications across multiple industries, including technical lead and QA lead roles. QA experience covers test strategy, regression suites, API testing with Postman, and test management in Jira, TestRail, and Zephyr. Shipped production software with React, TypeScript, Node.js, Angular, and Java. Since 2023, independent full stack development for small businesses and personal projects, plus continuing education in cloud platforms (AWS and Azure). Bilingual Spanish/English. Equally effective as an individual contributor and as a technical lead.

PROFESSIONAL EXPERIENCE

Independent Full Stack Developer | Remote *2023 – Present*

- Small-scale client work for local businesses plus personal portfolio projects, built end to end.
- Designed and built a management web application for Complete Pool Service Inc. (live demo: complete-pool-app.vercel.app), including role-based access control (Owner, Admin, Worker) and task workflows.
- Built the backend with Next.js and Prisma (ORM) on a relational database, with NextAuth authentication and signature-based estimate approval.
- Developed the interface as a responsive PWA with Tailwind CSS and an interactive calendar (FullCalendar) for service scheduling.
- Built to replace the company's paper-based process and centralize its business information; now in acceptance testing with the owner.
- Worked autonomously through the full cycle: requirements gathering, data modeling, development, testing, and deployment.

Portfolio: Full Stack Ecommerce Platform - github.com/sahc1987/Ecommerce

- Developed an ecommerce platform with a customer storefront and an admin dashboard, with a Node.js/Express backend and a React 18 + TypeScript (Redux Toolkit) frontend, on PostgreSQL and Redis.
- Implemented order placement within a transaction using row-level locking to prevent inventory oversell under concurrent purchases, plus sales analytics for the administrator.
- Hardened security with httpOnly-cookie JWT authentication, bcrypt hashing, Helmet headers, per-IP rate limiting, and magic-byte image validation.

General Manager | The UPS Store – Brickell, Miami *October 2020 – Present*

- Manage daily operations of one of the top three highest-performing UPS Store locations in Florida (per UPS franchise reports).
- Responsible for P&L, inventory control, vendor relationships, and staff development.
- Manage long-term relationships with business clients in the Brickell corridor.
- Identified an operational need and built CentralDesk, an internal management tool (React + Node.js/Express with a REST API) that centralized daily store operations, streamlined team task flows, and reduced manual work and errors.

Full Stack Developer | Telus International *March 2019 – September 2020*

- Built and maintained React + TypeScript front-end applications.
- Built a full stack application (React frontend, Node.js backend, Cassandra database) to manage the platform's APIs, which were published through a Kong gateway maintained by the infrastructure team.
- Maintained the team's CI/CD pipelines in Jenkins and OpenShift.
- Built Tableau Server dashboards to surface CI/CD quality KPIs, enabling data-driven release decisions.
- Stack: React, TypeScript, Node.js, Cassandra, Docker, Kubernetes (OpenShift), Jenkins, AWS, Google Cloud, Tableau Server.

Team Lead & QA Lead | Omnisport El Salvador *September 2017 – March 2019*

- Led a team of 5 developers and 3 testers through full software delivery cycles, from requirements to production rollout.
- Delivered enterprise solutions with JSF, JPA, Oracle DB, and WebLogic Server, meeting client acceptance criteria.
- Defined the end-to-end testing strategy: test plans and regression suites that caught most defects before production, plus patch release management.
- Cleared a backlog of roughly 50 projects stalled in testing and client acceptance, bringing the team up to date on deliveries.

Team Lead & Software Engineer | Mitratech Holdings *November 2013 – August 2017*

- Led a team of up to 12 developers and testers across multiple client projects, translating business requirements into technical specifications.
- Modernized the implementation of HotDocs, an automatic document-generation system that only ran on Internet Explorer, migrating it to a new cross-browser-compatible version.
- Coordinated sprint planning and ensured on-time milestone delivery across multiple client projects.
- Ensured long-term scalability and maintainability of client-facing legal software applications.
- Diagnosed and resolved critical production bugs, improving application stability and client satisfaction.
- Stack: Java, JavaScript, HotDocs, .NET / C#, SQL Server, Oracle, Apache Tomcat, IBM WebSphere.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, C#, SQL, HTML5, CSS3

Paradigms: Object-Oriented Programming (OOP), REST APIs

Frontend: React, Next.js, Angular, AngularJS, Tailwind CSS

Backend: Node.js, Express.js, Prisma, Spring Boot, Spring, Hibernate, JPA, JSF, .NET

Application Servers: Oracle WebLogic, IBM WebSphere, Apache Tomcat

Databases: PostgreSQL, MySQL, MongoDB, Oracle, SQL Server, Cassandra

DevOps & Cloud: Docker, Kubernetes, Jenkins, OpenShift, AWS, Google Cloud, CI/CD, Git

Testing & Quality: Test planning, regression testing, UAT, API testing (Postman, REST Assured), Jira, TestRail, Zephyr, Jest, SonarQube, unit and integration testing

Tools: Microsoft Office, MS Project, Linux, NextAuth, Tableau Server, VS Code, IntelliJ

CONTINUING EDUCATION — CLOUD

Cloud certification study track (2025–2026): AWS Cloud Practitioner (CLF-C02), AWS Developer Associate (DVA-C02), AWS AI Practitioner (AIF-C01), and Microsoft Azure Fundamentals (AZ-900).

EDUCATION

Computer Systems Engineering (Ingeniería de Sistemas Informáticos) | Universidad de El Salvador *2008 – 2013*

LANGUAGES

Spanish (native) • English (professional / bilingual)
